Stochastic Processes and their Applications 1 (1973) 185–186. © *North-Holland Publ. Co.*

Corrigendum to WEAK CONVERGENCE OF COMPOUND STOCHASTIC PROCESSES, I

Donald L. IGLEHART

Department of Operations Research, Stanford University, Stanford, Calif. 94305, USA

Editor's note. The page proofs of Professor Iglehart's paper, sent to him in error by surface mail, arrived at Stanford two months after mailing. To avoid further delay in the appearance of the first issue, the Publisher took the liberty of correcting proof, thereby depriving Professor Iglehart of the opportunity to remove some printing errors and to make necessary changes and additions.

p. 11, l. 4 "Department of Statistics" should read "Department of Operations Research".

p. 11, l. 7 "superpositive" should read "superposition".

p. 11, l. 14 "$\sum_{j=1}^{M_{lv}}$" should read "$\sum_{j=1}^{m_{lv}}$".

p. 11, l. 15 "m_l" should read "m_l"

p. 13, l. 18 "process" should read "processes".

p. 13, l. 23 Delete "eq."

p. 13, l. 24 "IN^M" should read "N^M"

p. 13, l. 25 and p. 14, l. 15 "non-negative components" should read "non-negative integer-valued components".

p. 15, Lemma 2.2 Should read "If f is bounded, measurable, and continuous a.e. (Lebesgue), then ...".

p. 15, l. 14 Should read "Since f is bounded, continuous a.e., and measurable, ...".

p. 16, l. 10 "indicator function" should read "indicator function of".

p. 16,
Cor. 2.3 "is bounded and measurable" should read "is bounded, continuous a.e., and measurable".

p. 17,
eq. (4) Should read $T_n^*(t) = n^{-1/2}\left(\sum_{l=1}^{A_n(t)} m_l - n\lambda\,\mu t\right), \quad 0 \leqslant t \leqslant 1.$

p. 18, l. 2 Delete "due to Liggett and Rosén".
p. 18, l. 15 "sequence" should read "sequences".
p. 19, l. 3 Should read "i, j and ν, and $\sigma_{ij}^{\nu}(s-\cdot, t-\cdot)$ is continuous a.e. (Lebesgue) for all $0 \leqslant s \leqslant t \leqslant 1$.
p. 22, l. 10 The second integral should read "$\int_0^t$".

p. 24, l. 8 "$\alpha = \frac{1}{2}$" should read "$\alpha > \frac{1}{2}$".
p. 24, l. 24 "$F_n(1) \to F(t)$" should read "$F_n(t) \to F(t)$".
p. 27, l. 2 "has transition probabilities" should read "has standard transition probabilities".
p. 28, l. 6/7 Should read "We assume that H^{ν} satisfies $H^{\nu}(t) - H^{\nu}(s) \leqslant K(t-s)^{\alpha}$, where $\alpha > \frac{1}{2}$.".
p. 28, l. 8 Should read "Then $k = 1$, $m_l = 1$, and $Y(t)$ ...".
p. 28,
last line Add "See [3] for further discussion of this example."
p. 31, l. 2 The last factor should read "$E^{1/2}\{[\xi^0(u) - \xi^0(t)]^4\}$".
p. 31,
ref. [6] Should read "B.V. Gnedenko and A.N. Kolmogorov, Limit distributions for sums of independent random variables (Addison–Wesley, Reading, Mass., 1969)."
